Content

The Premier Advanced Practice Provider Committee is proud to present this Clinical Update. This program is designed to provide current information on selected topics in clinical practice and pharmacology for APRN, PA, and all practicing physicians.

Participants in this program will:

- Understand different techniques and communication skills to reduce risk of medical malpractice.
- Understand the pathophysiology, goals, and current pharmacological treatment of chronic pain for complex patients.
- Discuss the benefits of having Advance Practice Providers (APP) on care teams in various settings.
- Identify past and current methods for measuring APP productivity, along with the pros and cons of these different methods.
- Identify symptoms, diagnosis and management of urinary tract infections (UTI) and overactive bladder including pharmacological options for each.
- Identify appropriate screening, diagnostic testing and interventions used to treat Peripheral Arterial Disease as well as ongoing management of PAD.
- Understand a basic neuro exam, common neurologic complaints, diagnostic work up and treatments.
